BTP Progress Report — Part 1

Devansh Gupta

1 November 2026

1 Scope of Part 1

Part 1 covers Tasks 1 to 3 of the implementation plan. Task 1 is the state crosswalk. Task 2 is the PhonePe Pulse ingestion. Task 3 is the population projections. Part 1 also includes the BTP-I report skeleton (Chapters 1 and 2, outline only). The design specification is `docs/superpowers/specs/2026-11-01-upi-financial-inclusion-design.tex`.

2 What was built

State crosswalk. The file `src/py/btpdata/state_crosswalk.csv` maps the state names of each source to one `state_id`. There are 35 ids. The main sample has 30 ids: 28 states, Delhi, and Jammu and Kashmir (which includes Ladakh). The other five ids are union territories. The module `src/py/btpdata/states.py` reads the file.

PhonePe Pulse ingestion. The modules `fetch_phonepe.py` and `parse_phonepe.py` in `src/py/btpdata/` read PhonePe Pulse commit `257bf38` [6]. The output is `data/interim/phonepe.csv`. It covers 2018Q1 to 2026Q2 and has three variables: `phonepe_count`, `phonepe_amount_inr` and `phonepe_users`.

Population projections. The file `data/manual/population_ncp2020.csv` holds Table 8 of the NCP 2020 report [4], in thousands, as on 1 March. The module `src/py/btpdata/population.py` converts it to quarterly values and writes `data/interim/population.csv`. The rule is: the value for Q1 of year y is the value for y. The value for quarter q is $P_y + \frac{q-1}{4}(P_{y+1} - P_y)$. The rule needs the value for 2027 to compute 2026Q2.

3 Numbers

Table 1: Totals over the 35 state ids.

Quarter	Transactions (million)	Amount (Rs. lakh crore)	Registered users (million)	Population (million)
2018Q1	139.98	0.17	47.48	1318.68
2022Q2	8953.70	15.10	393.81	1376.87
2026Q2	38664.29	45.50	711.65	1426.04

The file `data/interim/phonepe.csv` has 3570 rows. The file `data/interim/population.csv` has 1190 rows. Each file has 35 state ids.

The sum of the state values divided by the India value is 1.0000015 for 2018 (1 318 680 and 1 318 678 thousand). It is 0.9999993 for 2027 (1 433 851 and 1 433 852 thousand).

The test suite has 27 tests. All 27 pass.

4 Data findings so far

The specification (Section 1) lists three data constraints.

- NPCI publishes state-wise UPI data only from April 2025 [5, 2]. The PhonePe series is therefore the main adoption variable. The NPCI data is for validation only. One analysis [3] reports that 27.5% of FY25 UPI volume has no state attribution.
- The RBI Financial Inclusion Index is published for India only, not for states [7].
- The PMJDY state-wise statistics are one snapshot (21 October 2026) with no history [1].

5 Open items

- Task 0: supervisor approval of the PhonePe proxy. Department rules for the report format.
- Manual downloads for Part 2: MoSPI state CPI, January 2018 to June 2026. NPCI state files, April 2025 to June 2026.

6 Next

Part 2 covers Tasks 4 to 7.
